

**ANNUAL REPORT OF 2015 DATA FOR  
THE LOWER NIOBRARA NATURAL RESOURCES DISTRICT AND  
NEBRASKA DEPARTMENT OF NATURAL RESOURCES  
INTEGRATED MANAGEMENT PLAN**

Prepared by the Nebraska Department of Natural Resources

For the Annual Meeting August 4, 2016

**Introduction**

The Lower Niobrara Resources District (LNNRD) and the Nebraska Department of Natural Resources (NeDNR or Department) jointly adopted an Integrated Management Plan (IMP) which became effective on May 1, 2014, with the goal of jointly managing ground and surface waters within the LNNRD to sustain a balance between water uses and supplies for the long term. The purpose of the report is to fulfill the Department of Natural Resources (Department) responsibilities under the integrated management plan (IMP) annual reporting obligations and provide updates to current monitoring projects or studies as outlined in the IMP.

Reporting and exchanging information gathered from monitoring projects, streamflow data, or other studies provides a basis to increase understanding of the surface water and hydrologically connected groundwater system. As surface water and groundwater are hydrologically connected throughout much of the district, estimates of water quantity of either surface water or groundwater cannot be evaluated separately. The data gathered through this IMP's monitoring plan are designed to evaluate and measure the success of the objectives of this IMP. This information exchange also helps to test the validity of the conclusions and information upon which the IMP is based. This report contains information from January 1, 2015, through December 31, 2015.

**Department Reporting: Data**

The IMP requires that the Department annually report on the following surface water data within the District on an annual basis:

- 1) Streamflow measurements;
- 2) Surface water permits issued and/or denied;
- 3) Surface water usage data, such as voluntary water use reports, flow meter data, crops irrigated, and acreage irrigated;
- 4) Groundwater transfers approved; and
- 5) Offsets provided for depletions resulting from increased consumptive use related to any of the above listed items.

Details for each of these items are as follows.

1) Streamflow Measurement

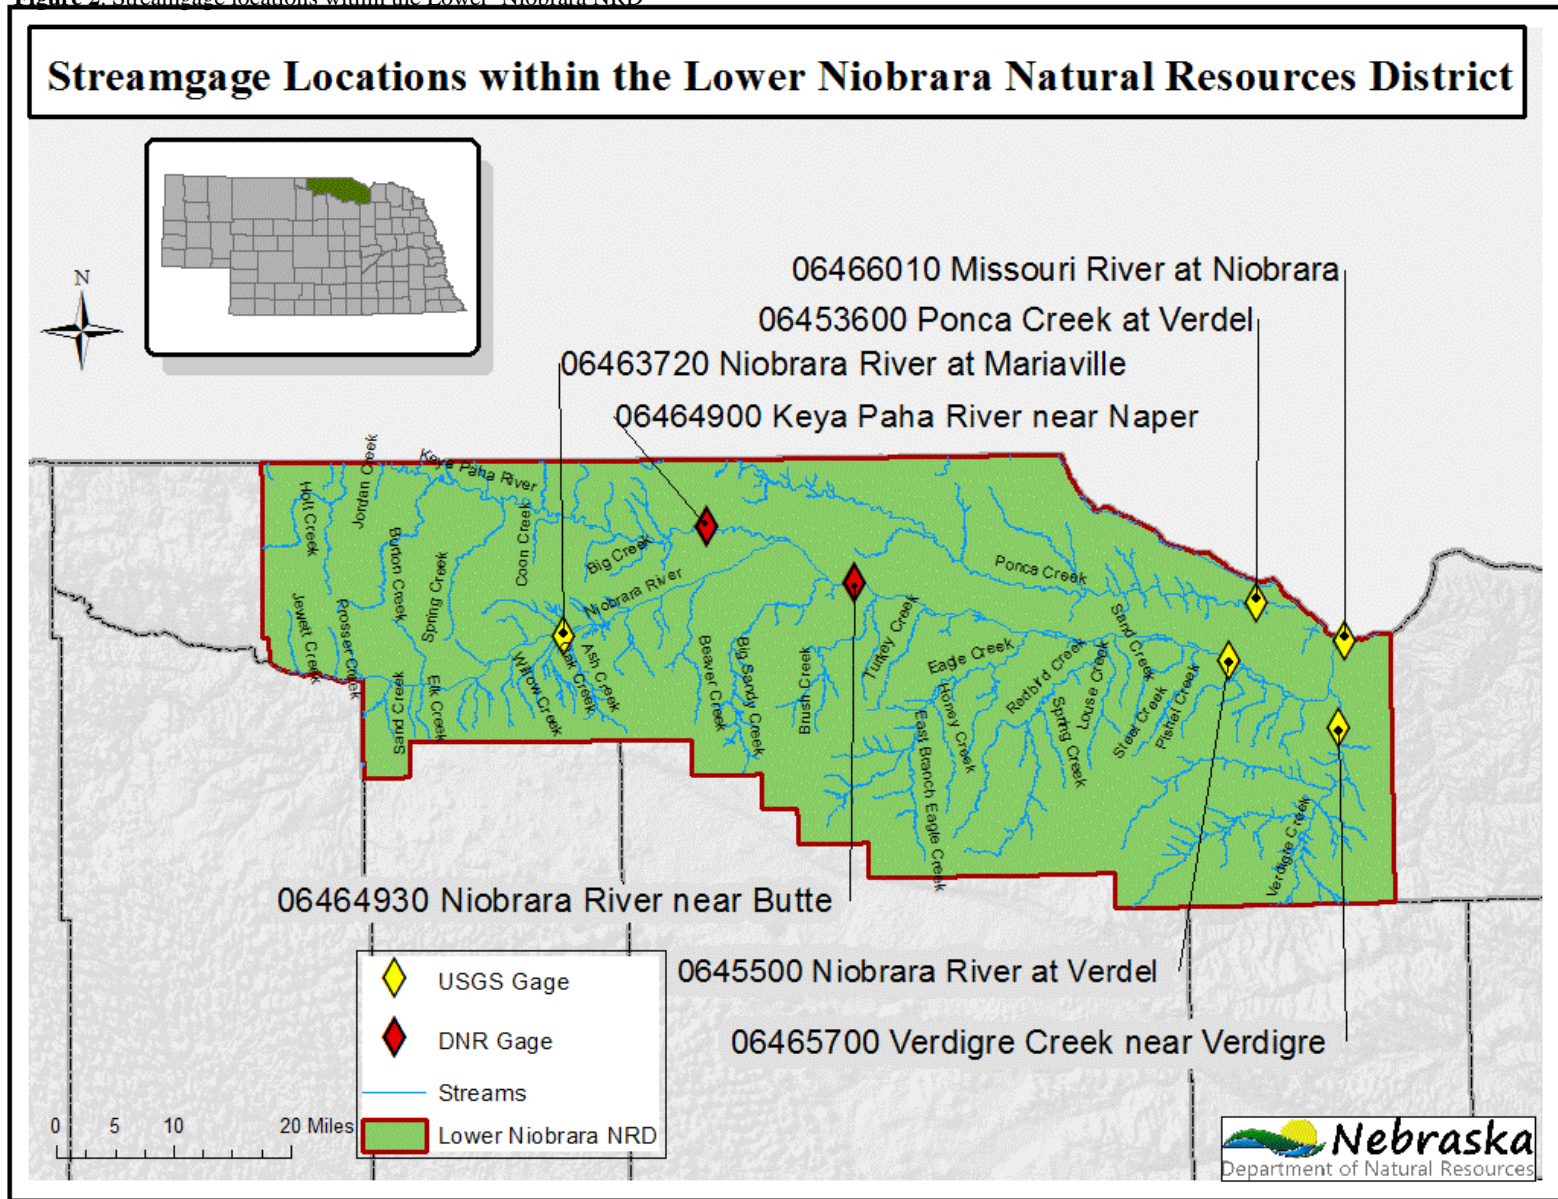

- a. The one-time streamflow measurements made in the field by the Department in eight locations during 2015, are included in **Table 1**, and shown on **Figure 1** below.

**Table 1.** Streamflow measurements taken by NeDNR staff in 2015

- 2) Streamflow measurements made by the USGS and the Department from streamgages located within the LNNRD are shown on **Figure 2**. Daily streamflow measurements from these streamgages for calendar year 2015 are shown in **Appendix 1**. This streamflow data can be acquired from USGS's National Water Information System at <http://waterdata.usgs.gov/>. The USGS stream gage on the Missouri River at Verdel, Nebraska, number 06453620, does not collect discharge data, and only has stage data beginning on January 19, 2015, therefore this record shows no data.

2) Surface Water Permitting

- a. There were 6 surface water applications approved during 2015. These are listed below in Table 2. This resulted in zero new irrigated acres. The permits approved in 2015 are listed in **Table 2**, below are to store water, irrigate existing surface water irrigated land, or for domestic use.

<sup>1</sup> This appropriation provides supplemental water to a previous storage-use appropriation A-18556, therefore no new irrigated acres result from the permit.

<sup>2</sup> This appropriation is no longer active. Canceled on 4/26/2016, and will be included in the 2017 report of cancellations.

<sup>3</sup> This appropriation provides water from a second source, for irrigation on land already under a permit to irrigate (A-18838R) therefore no new irrigated acres result from the permit.

<sup>4</sup> Domestic use is not considered irrigated agricultural crop acres, therefore no new irrigated acres result from the permit.

- b. Two surface water permits were cancelled and one application was dismissed during 2015, and are listed below in **Table 3**. This resulted in a cancellation of 187.0 irrigated acres. The basis for the Department’s action taken on each, is listed below.

Basis for Department Action:

1. After a field investigation found the appropriation had not been used in the last 5 years, the owner signed and submitted a voluntary relinquishment-in-full of surface water appropriation.
  - a. Authority upon which the action was based: *Department Rules for Surface Water, Neb. Admin. Code. Title 457, Chapter 3*. Any appropriation, or part of any appropriation, may be voluntarily relinquished. The relinquishment shall be made on a form provided by the Department.
  
2. A field investigation found the appropriator had not perfected their water right by beneficially applying the water, in the time allowed, by September 1, 2015.
  - a. Authority upon which the action was based: *Neb. Rev. Stat. §46-229.02(7)* A water appropriation that has not been perfected pursuant to the terms of the permit may be canceled by the department without complying with sections 46-229.01 to 46-229.04 if the owner of such appropriation fails to comply with any of the conditions of approval in the permit, except that this subsection does not apply to appropriations to which subsection (2) of section 46-237 applies.
  
3. The Department received information the applicant was no longer the owner of the land pertaining to the pending application, and has no transferable property right. Therefore the pending application was dismissed.
  - a. Authority upon which the action was based: The Nebraska Supreme Court has determined that a water right applicant has no transferable property right in an application for a permit to divert water and that permitting the assignment of applications could lead to collusion, thereby defeating the rights of other parties along a stream. (*Catherland Reclamation District v. Lower Platte North NRD*, 230 Neb. 580, 433 N.W. 2d 161 (1988))

- c. Surface Water Usage Reporting – There were 153 respondents to NeDNR’s voluntary surface water use reporting of activities in 2015. A total of 3,917 acres were categorized by irrigated, non-irrigated and crop type. Corn was grown on the greatest number of acres, with soybeans a close second of the irrigated crops. The greatest number of acres of non-irrigated crops was in hay or forage, with alfalfa second. The reported data is shown in **Table 4**.

- 3) Groundwater Transfers – The Department did not act on any Groundwater Permits during 2015.
- 4) Offsets approved – No offsets were approved in 2015.
- 5) Education and Outreach Activity in 2015
- a. NeDNR participated in the joint Lower Niobrara NRD and Upper Elkhorn NRD’s Water Issues Town Hall Meeting, on February 24, 2015. Topics covered:
    - i. Surface water permitting procedures
    - ii. NeDNR Field office functions
    - iii. Integrated water management activities
