LOWER NIOBRARA
NATURAL RESOURCE DISTRICT

Phase II Reports are now due for all producers located within Phase II areas.
This year, we have transitioned to a new online reporting platform, Producer Connect. You will need to register through Producer Connect; once your registration is submitted and verified, you will receive a confirmation email granting access.

Crop Reporting Forms are required for *all* fields over 40 acres within the Phase II Area—regardless of crop type or cropping practice.
If you are an absentee landowner or rent out your land, *please forward this notice to your tenant* so they can complete and submit the required forms.

Please note: All crop reports must be submitted online. Paper forms will not be accepted. Failure to comply will result in an irrigation cease and desist order until reporting requirements are met.

If you need assistance or have any questions, please contact the LNNRD office at 402-775-2343.
