FOR IMMEDIATE RELEASE

Lower Niobrara NRD Extends 2025 Phase II Reporting Deadline to March 1, 2026

Butte, Neb. — The Lower Niobrara Natural Resources District (LNNRD) Board of Directors has voted to extend the deadline for Phase II reports for the 2025 growing year to March 1, 2026, due to recent updates to the district's reporting software.

The district has transitioned to a new reporting system in partnership with Producer Connect, creating a centralized platform designed to streamline reporting and improve access to NRD services.

Producers are required to register for an account through the LNNRD website or by visiting producerconnect.com. Once registration is complete and access has been granted by the LNNRD, producers must contact the LNNRD office so staff can verify that all tracts are properly associated with their account. Producers who need assistance with registration or reporting are encouraged to schedule an appointment with NRD staff for in-office support. Producers are reminded not to wait until the deadline to complete their reports, as this extension is provided as a courtesy to ensure accuracy during the transition to this new platform.

For assistance with registration or questions regarding Phase II reporting, producers may contact the Lower Niobrara NRD office at 402-775-2343.

The Lower Niobrara Natural Resources District remains committed to supporting local producers while continuing to protect and manage the region's natural resources.
