LOWER NIOBRARA
NATURAL RESOURCE DISTRICT

Phase II Reports Due March 1

The Lower Niobrara Natural Resources District reminds all producers farming in **Phase II areas** that annual nitrogen management reports are due **March 1**.

Following the transition to **Producer Connect**, reports must be submitted through the new reporting system. Please ensure your information is entered accurately and submitted prior to the deadline.

Landowners remain ultimately responsible for compliance; however, renters and agronomists are encouraged to assist with reporting.

Once you have registered with Producer Connect you must contact the LNNRD office at **402-775-2343** to assign your fields.
