

Water Resources Intern (Chemigation & Field Monitoring)

Position Title: Water Resources Intern

Location: Lower Niobrara Natural Resources District (LNNRD) – Butte, Nebraska

Program Overview:

This internship provides High School/College students with hands-on experience in water resource management, with a focus on chemigation inspections, water sampling, and well monitoring. Interns will work alongside LNNRD staff to support programs that protect groundwater quality and ensure compliance with district regulations.

Responsibilities:

- Assist with chemigation inspections and documentation
- Help collect water samples from wells and other sources
- Support well monitoring and basic water checks
- Assist with recording and organizing field data
- Participate in site visits with landowners and producers
- Help prepare equipment and materials for fieldwork

What You'll Learn:

- How chemigation systems are inspected and regulated
- Basics of groundwater quality and nitrate monitoring
- Proper water sampling techniques
- Real-world experience in water resource management

Requirements:

- At least 18 years of age
- Ability to work outdoors in varying conditions
- Strong attention to detail
- Valid driver's license preferred

Position Details:

- Seasonal Full or Part time help from May – August
- Hourly wage
